

ACCESS SERVICES

(S)

SECTION 2 - INTRA-ISLAND SWITCHED ACCESS SERVICE

2.1 General

The Intra-Island Switched Access Service (ISAS) is available to Long Distance Service Providers (LDSP) for the provision of Intra-Island Long Distance service (ILD) to their end users. The service provides a two point communication path between the LDSP's designated premises and the end user's premises. It provides for the use of switching, transmission and local distribution facilities provided by the Company. ISAS provides the ability to originate and terminate calls between the end user's premises and the LDSP's designated premises. Subject to Section II following, ISAS is provided according to the terms and conditions of PRTC-Tariff FCC No. 1.

2.2 Reference to Other Tariffs

Whenever reference is made in this Section to other tariffs of the Company, the reference is to the tariffs in force as of the effective date of this Section, and to amendments and additions thereto and successive issues thereof. All reference made to other tariffs will apply according to the relevance it may have upon the service described in this Section. Dispositions contained in other tariffs and adopted by reference, may apply totally or partially.

2.3 General Rules

2.3.1 General rules, terms, and definitions for Switched Access, as per Sections two (2) and six (6) of PRTC-Tariff FCC No. 1, are adopted by reference, with the following exceptions:

- Page 6-6 Switched Access Service Diagram;
- Page 6-16 Section 6.1.3(A)(4);
- Page 6-24 Section 6.1.3(B)(2) first and second paragraphs;
- Page 6-46 Section 6.4.1(C)(3) second paragraph, last two lines (Information Surcharge and Residual Interconnection Charge);

and any other rule, term and definition that by its nature clearly and unequivocally does not apply to the service as offered by the Company.

2.3.2 The Company will be responsible only for the installation, operation, and maintenance of the service provided under this Section.

2.3.3 The service is provided twenty four (24) hours a day, seven (7) days a week, except as provided in other sections of this tariff.

2.3.4 The Company does not guarantee that the provided services and facilities comply with any other standard besides those specified in it's tariffs and used in the Company's normal operations.

ACCESS SERVICES (Cont.)

SECTION 2 - INTRA-ISLAND SWITCHED ACCESS SERVICE (Cont.)

2.3 General Rules (Cont.)

2.3.5 The Company will assess a Carrier Common Line (CCL) minute of use charge to each originating and terminating common line minute. The CCL rates can be found in Section 2.8.1 following. (T)

2.4 ISAS Description and Provision

2.4.1 Description

ISAS is provided to the LDSP for bi-directional long distance calls within Puerto Rico. Said service is provided through direct trunked transport and/or tandem switched transport connections. ISAS is connected to the switching system of the Company using trunk-side connections. Specifications regarding transmission parameters can be found in Section 15.1.2 of PRTC-Tariff FCC No. 1.

2.4.2 Provision

ISAS is furnished in quantities of trunks. When a LDSP requests ISAS, the amount of trunks between the LDSP's premises and the Company's switching equipment must be specified by the LDSP; as well as the trunks that will be utilized or converted to SS7. When the LDSP uses existing interstate access services facilities to handle its intra-island long distance calls, the LDSP shall provide corresponding PIU information to the Company, according to Section 2.3.11 of PRTC-Tariff FCC No. 1. Additional information that might be necessary for the provision of ISAS should be specified according to the procedures established for the request and ordering of access service.

2.5 Request and Service Order

ISAS is ordered under the switched access order provisions set forth in Section 5 of PRTC-Tariff FCC No.1, for switched access. Also, included in that section are regulations concerning miscellaneous service order charges which may be associated with ISAS ordering (e.g., service date changes, cancellations, etc.).

ACCESS SERVICES (Cont.)

(S)

SECTION 2 - INTRA-ISLAND SWITCHED ACCESS SERVICE (Cont.)

2.6 Rate Elements

2.6.1 There are four (4) rate elements that apply to ISAS:

- (A) Carrier Common Line
 - (1) CCL Minute of Use Charge
 - (2) Pre-subscribed Inter-exchange Carrier Charge (PICC)
- (B) End Office
- (C) Chargeable Optional Features
- (D) Local Transport

The following diagram depicts a generic view of the components of the ISAS and the manner in which they are combined to provide access service for intra-island traffic.

- CCL - Carrier Common Line
- LS - Local Switching
- EF - Entrance Facility
- Direct Trunked Transport
 - Direct Trunked Facility
 - Direct Trunked Termination
- Tandem Switched Transport
 - Tandem Switched Facility
 - Tandem Switched Termination
 - Tandem Switching

The aforementioned elements and sub-elements, with the exception of Common Line are described in Section 6.1.3 of PRTC-Tariff FCC No. 1. Any reference to rates and charges does not apply. Carrier Common Line minute of use is described in section 3 of PRTC-Tariff FCC No.1. The PICC (Pre-subscribed Inter-exchange Carrier Charge) is described in Section VII.H following.

SECTION 2 - INTRA-ISLAND SWITCHED ACCESS SERVICE (Cont.)

(N)

2.7 Transit Traffic Service

2.7.1 Terms and Definitions

- (A) Telecommunications Service Provider - a provider of local and/or access telecommunications service who is legally certified to provide service in Puerto Rico, or is licensed by the Federal Communications Commission (FCC) to provide Commercial Mobile Radio Service (CMRS). For purposes of this tariff, this definition includes, but is not limited to, CMRS providers and Competitive Local Exchange Carriers (CLECs).
- (B) Transit Traffic – Local Traffic originating on one Telecommunications Service Provider’s network that is delivered by PRTC to a different Telecommunications Service Provider’s network for termination.
- (C) Transit Traffic Service – PRTC’s provision of the functions to allow a Telecommunications Service Provider to send and receive Transit Traffic.
- (D) Local Traffic – for purposes of this tariff;
 - 1. For wireline-to-wireline traffic, Local Traffic is any IntraLATA circuit switched call transiting PRTC’s network that originates from and terminates to carriers other than PRTC, and for which PRTC does not collect toll charges or access charges, either directly or indirectly, as the IntraLATA toll provider for the end user. This traffic includes CLEC-to-CLEC traffic; or
 - 2. For wireless-to-wireless traffic, wireline-to-wireless traffic, and wireless-to-wireline traffic, Local Traffic is any circuit switched call originating from and terminating to carriers other than PRTC and transiting PRTC’s network that originates and terminates within the same Major Trading Area (MTA), subject to PRTC’s LATA restrictions. An MTA is the largest FCC-authorized wireless license territory which serves as the definition of local service area for CMRS traffic as defined in 47 C.F.R 24.202(a). This traffic includes, but is not limited to, CMRS-to-CMRS, CLEC-to-CMRS and CMRS-to-CLEC calls.

SECTION 2 - INTRA-ISLAND SWITCHED ACCESS SERVICE (Cont.)

(N)

2.7 Transit Traffic Service (Cont.)

2.7.2 Rules and Regulations (Cont.)

- (D) Notwithstanding anything in C. preceding to the contrary, in the event that the terminating Telecommunications Service Provider imposes on PRTC any charges or costs for the delivery of Transit Traffic, the originating Telecommunications Service Provider utilizing PRTC's Transit Traffic Services pursuant to this tariff shall reimburse PRTC for such charges or costs.

- (E) PRTC, as the tandem switching provider for Transit Traffic, will generate and deliver to the terminating Telecommunications Service Provider industry standard call detail records, where available, for its use in billing the originating Telecommunications Service Provider for the termination of Transit Traffic. Notwithstanding the foregoing, unavailability of such call detail records does not relieve the originating Telecommunications Service Provider of its obligation to pay the charges for Transit Traffic Service as specified in this tariff, nor does it create any liability to the terminating Telecommunications Service Provider on the part of PRTC.

- (F) Telecommunications Service Providers originating Transit Traffic may elect one of two options for measuring Transit Traffic minutes of use for which charges are due:
 - 1. The originating Telecommunications Service Provider shall utilize its originating switch recordings to compensate PRTC based upon actual Transit Traffic minutes of use ("Actual Measurements"). Telecommunications Service Providers electing to utilize Actual Measurements shall provide a monthly report to PRTC reflecting actual Transit Traffic minutes of use, along with payment on a per minute of use basis at the applicable rate set forth in Section 2.8.2, within sixty days of the date of usage.

ACCESS SERVICES (Cont.)

SECTION 2 - INTRA-ISLAND SWITCHED ACCESS SERVICE (Cont.)

(N)

2.7 Transit Traffic Service (Cont.)

2.7.2 Rules and Regulations (Cont.)

2. In lieu of Actual Measurements, the originating Telecommunications Service Provider shall provide to PRTC a percent local usage factor (PLU) estimating the percentage of total minutes of use delivered to PRTC that constitutes Transit Traffic ("Estimated Measurements"). The PLU must be provided to PRTC in writing within 30 days of the effective date hereof, or within 30 days of delivering Transit Traffic to PRTC. In the event the originating Telecommunications Service Provider fails to provide a PLU to PRTC during this timeframe, PRTC will assign a PLU to be used until a PLU is provided. To the extent a PLU is provided after the default PLU has taken effect, the PLU provided by the Telecommunications Service Provider shall be applied on a prospective basis only. The PLU shall be updated annually, or sooner in the event of a change in Local Traffic volume.
- (G) PRTC reserves the right to contest the accuracy of both the Actual Measurements and Estimated Measurements provided by Telecommunications Service Providers and may conduct audits or internal studies for verification.
- (H) In the event a dispute arises regarding Actual Measurements or Estimated Measurements, PRTC will continue to bill based upon information provided by the Telecommunications Service Provider or utilizing the assigned PLU until the dispute is resolved.
- (I) If PRTC and the Telecommunications Service Provider are unable to successfully negotiate a resolution to the dispute within 30 days of notice of the existence of a dispute, the aggrieved Party shall seek dispute resolution with the appropriate governing regulatory body.
- (J) Once the dispute is resolved; the parties shall utilize the resulting Actual Measurements or Estimated Measurements on a going forward basis. The parties shall negotiate a true up of any billing inaccuracies occasioned by application of such Measurement on a retroactive basis.
- (K) Charges shall be billed to the originating Telecommunications Service Provider and shall be payable under the terms of section 2.8.2.
